

THERE'S NOW MORE CHOICE WHEN IT COMES TO CAPSULOTOMY SIZE.

Introducing the ZEPTO Plus™ Handpiece

MORE CHOICES FOR MORE CASES

ZEPTO Plus™ provides a choice for surgeons who prefer a slightly larger capsulotomy, created with the same clinically proven technology as the current ZEPTO® Handpiece.

- Consistent energy and uniform temperature delivery for strong and precise 360° capsulotomies
- Precise suction for consistent, centered, circular capsulotomies
- Intuitive and ergonomic handpiece design for improved usability

ZEPTO Plus™

Take precision to a whole new level with the ZEPTO IOL Positioning System™

Designed to enhance the precision and efficiency of cataract surgery, the ZEPTO IOL Positioning System™ is the first and only device that creates an instantaneous capsulotomy for precise, 360-degree IOL overlap and improved outcomes.

CHOICE

Two sizes now available for precise IOL overlap

COMPLEX CASES

More routine, precise, and cost-effective

CENTERED

On visual axis for 360° IOL overlap

CONSISTENT

Shape and size

COST EFFICIENCIES

Significant cost and time savings with easy workflow integration and increased efficiency per case

ZEPTO® Handpiece

ZEPTO Plus™ Handpiece

Do your cataract cases require a larger capsulotomy?

ZEPTO Plus™ Handpiece produces consistent, centered capsulotomies with a greater circumference.
